

Integrated Electric-Propulsion & Power Systems

Experience the OSSA Powerlite advantage:

superior reliability, fuel efficiency, quiet operation and precise control

1. Permanent magnet propulsion motor (pod or conventional)

Highly efficient, direct drive motors designed exclusively for marine propulsion.

2. Variable-speed diesel DC generator

Glacier Bay DC generators are the heart of our integrated power system.

3. Power distribution and safety system Clean and elegant power distribution plus the security of our integrated GFS safety system.

4. Low voltage battery charger

5. Electric winch

6. Electric windlass

7. Wind generator

8. Solar panels

9. Hot water heater

Hot water anytime - with or without the engine.

10. Stove/ Oven

Eliminate the health risks of carbon monoxide and danger of propane.

11. HVDC Variable speed air-conditioning

Glacier Bay's Micro-Air system adds a whole new dimension to environmental control.

12. Throttle and digital controls

Conventional controls with programmable OSSA-CAN touch screen interfaces.

13. DC/AC inverter

For computers, entertainment systems and small appliances.

14. Isolation transformer

Makes your boat safe and fully compatible with any shorepower connection - worldwide.

15. Low voltage panel

16. High voltage panel

17. Shore power

115 or 230v ac, 50 or 60Hz.

18. Low voltage battery bank

19. High voltage battery bank
